**SoftJam** is a system integrator that provides companies worldwide with the most innovative digital technology to optimize their workflow and strategic assets. Our main goal is to help enterprises take advantage of the most innovative ways to enhance their business and increase profits while reducing costs and risks. We connect heterogeneous systems and put them at the service of companies. We create infrastructural solutions as Communication, Collaboration, laas, Paas and, thanks to them, we build projects where the IT actively supports business' processes.

We offer certificated onsite or remote technical support, as well as top consultancy on Microsoft technological solutions as a globally awarded Microsoft partner.
