

Programming and Code Development

14.00-17.30, October 15, A217 at DIBRIS, via Dodecaneso 35, Genoa, Italy, Part 1/4
14.00-17.30, October 29, A217 at DIBRIS, via Dodecaneso 35, Genoa, Italy, Part 2/4
14.00-17.30, November 5, A217 at DIBRIS, via Dodecaneso 35, Genoa, Italy, Part 3/4
14.00-17.30, November 19, A217 at DIBRIS, via Dodecaneso 35, Genoa, Italy, Part 4/4

POC: Prof. Francesco Masulli, University of Genoa, francesco.masulli@unige.it

Programming and Code Development are crucial components into the creation of New Applications and ICT Solutions. These Workshops provide the foundations in programming and basic elements working directly on examples within Comp.Int.Lab

Joint Cooperation

Workshop Description:

These Workshops provide **Foundations** in **Programming & Code Development** by **Direct Experiences** carried out in the **Computational Intelligence Lab**. Different **Problems & Programs** are proposed to the Attendees to be solved and developed by creating **specific simple Software Solutions**. The Workshops focus on use of **Python** as **Programming Environment**, even if the knowledge could be easily generalized to all major actual **Computer Languages** such as **C++, C#, Java**.

These intensive Workshops are devoted to inject into the audience the **Programming Background** required to **Strategic Engineers** for being able to create new **Algorithms** and to **interact with Computer Scientists & Informatics Engineers** in **joint teams** aiming to develop new **Strategic Engineering Solutions**.

Participants are invited to bring their laptop to class to install the sw and carry out practical exercises.

Free Access for Industries, Professionals and STRATEGOS Classes
